* Many of these brands have a cat line of food, too so be sure to check those out when you go to the store. Cats don't need any grain in their diet.

PREMIUM VS. GROCERY STORE BRANDS...

For those of you who may be scared away from feeding a premium food because of cost, Laura has calculated a breakdown of cost vs. ingredients in 4 different foods. You will be surprised that it actually only costs about \$5.00 more per month to feed a higher quality food because you feed so much less. Plus, you will pay less in future vet bills because your dog (and cat) will be so much healthier! Pay attention to the amount of meat, corn, by-products in the grocery store brands, as compared to the amount of meat and whole grains in the super premium brands.
